SUMMARY

Full Stack Developer with 1+ year of experience building and maintaining web applications using React.js, NestJS, PostgreSQL, and Prisma ORM. Skilled in designing secure REST APIs with JWT authentication and integrating third-party services across multiple live client projects. Experienced in collaborating with Agile teams to deliver reliable, scalable, and maintainable solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL, Python, C
- **Frontend:** React.js, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, Progressive Web Apps (PWA)
- **Backend:** Node.js, Express.js, NestJS, REST API Development, JWT Authentication, RBAC, Multer (File Uploads), Cron Jobs, Error Handling
- **Database & ORM:** PostgreSQL, MongoDB, Prisma ORM, Supabase
- **APIs & Integrations:** WhatsApp Business API (360dialog, Meta Cloud API), Google Maps API, Nodemailer, Swagger / OpenAPI
- **Tools & Deployment:** Git, GitHub, Postman, VS Code, Hostinger, Render, Netlify, Vercel, Nginx, PM2, Ubuntu Server, SSL/HTTPS
- **Practices & Soft Skills:** Agile / SDLC, Debugging, Problem-Solving, Team Collaboration, Communication

EXPERIENCE

Full Stack Developer | Luisant Software Solutions, Salem | Oct 2025 – Present

- Developed and maintained 7+ full-stack web applications using React.js, NestJS, PostgreSQL, and Prisma ORM, supporting 3+ live client projects from development through deployment.
- Designed and secured REST APIs with JWT authentication and centralized error handling, enabling reliable CRUD operations and data exchange across 500+ records.
- Implemented responsive, reusable UI components with React.js and Tailwind CSS, managed application state via Context API, and consumed backend services using the Fetch API, standardizing patterns across 7+ web applications for a consistent user experience.
- Resolved 20+ production issues in collaboration with 5+ senior developers using Git and GitHub, achieving an 88% on-time delivery rate across sprints.
- Supported production deployment of live applications on Hostinger, configuring Nginx reverse proxy and PM2 process management.

PROJECTS

Metro Homes ERP: Enterprise Real Estate Management System

Tech Stack: React.js, NestJS, Prisma ORM, PostgreSQL

- Implemented Role-Based Access Control (RBAC) across a 6-tier hierarchy (Admin, Director, Regional Manager, Branch Manager, BDM, Sales Manager), securing access to sensitive business workflows.
- Built Customer Registration, Site Visit, Booking, Payment, Receipt, Cancellation, and Refund modules end-to-end, with REST APIs developed in NestJS and Prisma ORM.
- Integrated WhatsApp Business API (360dialog) for OTP authentication and automated notifications, and Google Maps API for interactive location selection, with PDF booking-receipt generation.
- Designed a role-based Progressive Web App (PWA) for field employees and a Monthly Achievers Dashboard.
- Automated 90-day inactive-user management via scheduled Cron Jobs.

VSR_HMS: Hostel Management System

Tech Stack: React.js, NestJS, Prisma ORM, PostgreSQL

- Developed a full-stack hostel management system for student accommodation and campus operations, covering student registration, room allocation, fee management, mess and canteen operations, gate logs, outpass processing, and staff administration.
- Implemented QR-based student identification through digital ID cards for mess attendance verification and efficient check-in workflows.

- Integrated canteen management features including category and product management, purchase tracking, supplier payment handling, and billing operations.
- Automated monthly fee generation and overdue fine calculation using NestJS cron jobs, with tracking of hostel billing and dues.
- Designed staff attendance and payroll workflows with punch validation, attendance classification, duplicate-scan prevention, and monthly salary tracking.
- Secured multi-role administration with JWT authentication, role-based access control, and dynamic menu permissions.

Manthraalaya: Hospital Management System

Tech Stack: React.js, Tailwind CSS, NestJS, PostgreSQL

- Developed Appointment, Consultation, and Follow-up modules with secure backend APIs (NestJS, PostgreSQL) and an Admin Dashboard for real-time patient and appointment management.
- Designed a responsive frontend using React.js and Tailwind CSS for a polished patient experience.
- Integrated the Meta WhatsApp Cloud API to automate Welcome and Appointment Confirmation messages to patients.

EDUCATION

Bachelor of Technology, Information Technology | Vivekanandha College of Technology for Women, Tiruchengode | Aug 2019 – Mar 2023
CGPA: 8.6 / 10.0

CERTIFICATIONS

MERN Stack Development Certification | ETS Academy, Erode | 6-Month Internship

- Delivered the WonNet Jobs portal using React.js, Node.js, Express.js, and MongoDB, supporting 4 distinct user roles.
- Applied JWT authentication and role-based access control, enabling application tracking for 100+ applicants.
- Integrated Nodemailer to send real-time email notifications to each applicant on HR-driven status updates, improving candidate communication efficiency.
